Campus Gasthuisberg

Herestraat 49

B – 3000 Leuven

Dear Madam/Sir

A Zikavirus infection during pregnancy may increase the risk of several congenital birth defects.

Please inform your treating physician if you have been at risk of a Zikavirus infection in the past six months or if you have had a Zikavirus infection in the past six months.

You are at risk of a Zikavirus infection if in the past 6 months you:

- stayed in an area at risk of Zikavirus transmission *
- had unprotected sexual intercourse with a partner who has been in an area at risk of Zikavirus transmission *
- had unprotected sexual intercourse with a partner who was infected with Zikavirus

Yours faithfully

Leuven university fertility centre
